Early Intelligence Data of the ETF

Centaurus Gate is a scifi themed RPG based on a rebuild of WEG's Star Wars D6 game and inspired heavily by Farscape. This page is an index into all the preliminary scouting reports from the Expedition Task Force early intelligence program, which sent scout ships all through the Serpentine Spinway.

These Reports

Each report is a single page of data on some aspect of the area of space explored by the early intelligence program of the ETF. There are one-hundred of them in total, and it would be easy for the Exec to say, roll up one randomly if needed during play. Consult the Executive's Guide for more details on this process. The reports are available to both player and Exec, as their explorers should all have access to this information from the ETF.

We break these down into five types: Threats, Species, Society, Technology, and Telemetry.

- **Threats** contains data reports on just as what that, anything discovered that directly threatens the ETF and/or humanity in general.
- **Species** contains detail reports of various uncommon Astral or Exotic alien races discovered.
- **Society** contains information reports on the status of society at different places in the Spinway.
- **Technology** contains specification reports on alien technology of note.
- **Telemetry** contains location reports from across the Spinway: planets, anomalys, etc.
