- Weasel
- Wildebeest
- Wolf
- Yak *
- Zebra †
- Zhuque *
- *: Found in Book of Jade
- †: Found in Book of Horn and Ivory

Notes

The canonical major political families are majority mono-species, with members of other species either organized in affiliated minor Houses or folded in via adoption. This needn't mean much to a player character, though if you have designs to infiltrate a Great House, being of a matched species makes things just a little easier! The *Avoirdupois* are Horses; the *Bisclavret* and *Phelan* are Wolves; the *Doloreaux* are Boars; and the *Rinaldi* are Foxes.

Reptiles, insects, and the supernatural-tinged Jade species (Qiling and Zhugue) are rare in Calabria.

We won't be playing out fantasy Orientalism here, but playing one of these species can mean your character goes a long time between meeting anyone new who looks like them, with whatever RP implications that holds for you!
