2025/10/25 01:45 1/1 Introduction

Introduction

This is a database of terminology explicit to the Karbon universe. These are poorly organized at the moment, but that will be fixed.

Basic Terms

Here quite a few basic terms that need defining and that occur in the rest of the document.

• Lace: A crystal technology grafted onto living cells. It is generally used to enhance the performance of human beings, and occasionally other life-forms. See Lace.
