

# Introduction

This is a database of terminology explicit to the [Karbon](#) universe. These are poorly organized at the moment, but that will be fixed.

## Basic Terms

Here quite a few basic terms that need defining and that occur in the rest of the document.

- [Lace](#): A crystal technology grafted onto living cells. It is generally used to enhance the performance of human beings, and occasionally other life-forms. When activated, Lace glows fainting with a color, this color is an indicator of its type. The type of lace is encoded by the creator to denote its purpose.
