Opening Scroll For The Adventure

A long time ago, in a galaxy far far away...

The galaxy is in a state of turmoil after the loss of the second Death Star and eventual collapse of Palpatine's Empire entirely.

In this dark time, heroes have emerged to stand against the corrupt that seek to exploit the people across the galaxy.

Near the edge of the rim, a new discovery is made that might change the course of society as the galaxy knows it.

Deep inside the void of the mirror nebula, which had eluded all exploration because hyperdrives can't pierce it, has

been found a world once inhabited by an long gone advanced civilization.

Calling it New Alderaan, a group has taken it under their control, and intends to leverage it's wonders to issue in a new era of hope for the entire galaxy.

??? But can they ???

(To be replaced after first session of play establishes more)
